

During this time of year, tent caterpillar egg casings on the branches of deciduous trees are easy to spot. Remove them now, or leave them as an important part of the ecosystem.

---

Whatever the physical challenge, take heart and continue to enjoy gardening by implementing some of these adaptive methods.

---

Explore the benefits of using keystone plants to create a wildlife-friendly ecosystem in your own garden.

---

Learn about pollinators and open your eyes to the beauty and intricate connectivity of nature. As gardeners, we can make choices that will enhance or inhibit pollinators.

---

Join us for a day of discovery and learning at the Skagit Master Gardener's Discovery Garden in Mount Vernon
